

**Puzzled** by **OBSOLESCENCE?**  
let **SARNOFF** be your **solution**

**Need an ASIC that won't go obsolete?** Sarnoff's emulation products have a long-standing reputation for solving our customers' obsolescence challenges providing a **continuing source for the life of the system.**

Sarnoff's new generation of emulation technologies provides the capability for form, fit, and function **ASIC replacement, FPGA-to-ASIC conversion** and improved board reliability and performance through **IC consolidation**—addressing your production and sustainment requirements with a continuing source of military quality microcircuits.

**Visit [www.gemes.com/puzzle](http://www.gemes.com/puzzle) to learn more about Sarnoff's new capabilities**
